

APFC RT Manual

Built documents — open any chapter as a page-numbered A4 PDF

Version	v1.0
Compiled	16 August 2026
Exam stage	Recruitment Test (RT)

ACTION · PDFS ARE BUILT AND READY

Every chapter is generated as a **print-quality A4 PDF** in the `pdf/` folder, with a running header, **"Page X of Y"** numbering, and no page breaks through the middle of a callout, table or question block. Download those directly — that is the version to read and print.

The HTML is the same content for reading on screen; it reflows for phone and tablet.

Module 6 — Accounting, Auditing & Statistics · complete

Ch	Topic	PDF	On screen	Q
F6.1	Accounting fundamentals — equation, double entry, books, trial balance, error types	PDF, 39 pp	HTML	40
F6.2	Concepts, conventions, standards — and capital versus revenue	PDF, 35 pp	HTML	40
F6.3	Final accounts, adjustments, provisions and reserves	PDF, 28 pp	HTML	30
F6.4	Depreciation, goodwill and inventory valuation	PDF, 26 pp	HTML	30
F6.5	Ratio analysis and cash flow	PDF, 22 pp	HTML	25
F6.6	Bills of exchange and share capital	PDF, 24 pp	HTML	25
F6.7	Auditing — concepts, scope, types, audit report	PDF, 29 pp	HTML	30
F6.8	Statistics — central tendency, dispersion, correlation	PDF, 21 pp	HTML	25

Module 7 — Insurance · complete

Ch	Topic	PDF	On screen	Q
F7.1	Insurance — principles, types and social insurance	PDF, 21 pp	HTML	20

245 pages, 265 practice questions, every answer key balanced across the four options and verified against its intended option text.

Reading order, and the shortcuts

Read **F6.1 » F6.2 » F6.3 » F6.4** in sequence — each depends on the one before. F6.5 to F7.1 are independent of each other and can be taken in any order.

If your time collapses, these are the sections that carry the most marks:

- **F6.1 §6** — trial balance and the four errors it cannot catch
- **F6.2 §5** — capital versus revenue, and the five one-word pairs
- **F6.3 §5 and §6** — the year-end adjustments, and provision versus reserve
- **F6.4 §2 and §5** — SLM versus WDV, and AS 2's lower of cost and net realisable value
- **F6.7 §2** — the scope of audit, the only section in Module 6 with direct PYQ evidence

Project state

The **Master Content Register** is the source of truth. Read it first if you are resuming after a break.

- **Complete:** Modules 1, 2, 3, 5, 6, 7 — 53 chapters, 130 hours, 142.5 planning marks
- **Remaining:** Modules 4, 8, 9, 10, 11 — 94 hours, 157.5 planning marks

What to do next

1. **Module 9** — General Science and Computer Applications, 42.5 marks. The fastest conversion on the board for a Mechanical Engineer
2. **Module 4** — Economy, lean, 8 hours
3. **Module 10** — Integrated Current Affairs
4. **Module 11** — PYQ analysis, five full mocks, final revision

Module 8 (English, Quant and Reasoning) is **80 planning marks — the largest single block in the paper** — and runs *daily* in the evening slot rather than as a block of its own. If it is not already running, start it now.

Rebuilding

```
`` python3 build/build.py # src/*.md -> docs/*.html python3 build/check.py # quality gate env -u NODE_OPTIONS node
build/pdf.mjs # docs/*.html -> pdf/*.pdf ``
```

Sources in `src/` are the master manuscript. `docs/` and `pdf/` are generated — never edit them by hand.
